

This errata sheet lists the errors for the doctoral thesis written by Ida Järleskog, titled *Occurrence of Traffic-Derived Microplastics in Different Matrices in the Environment*. Chalmers University of Technology. ISSN: 0346-718X

Page, Chapter	Original text	Correction
49, 4.8.2	The tire wear varied between 59–171 g/vkm (average 95–136 g/vkm)...	The tire wear varied between <b>0.059–0.171 g/vkm</b> (average <b>0.095–0.136 g/vkm</b> )...
Paper I, 3.2	<p>Fig 7. The boxplots showing the MP in stormwater is wrong since it shows the &lt;20 µm instead of &lt;100 µm. The text is correct.</p> 	
Paper II, 3.6	...(Tian et al., 2021). The median lethal concentration of this substance is as low as 0.8 µg/L.	...The median lethal concentration of the transformation product of the 6PPD,, named 6PPD quinone, was as low as 0.8 µg/L while the 6PPD was found to be lethal for salmons at concentrations of 251 µg/L (Tian et al., 2021).
Paper III, 3.3	The results showed a relative number concentration...(2–20 µm $\bar{x}$ = 78%, 20–125 µm $\bar{x}$ = 74%) followed by the sum of Trip (2–20 µm $\bar{x}$ = 19%, 20–125 µm $\bar{x}$ = 22%).	The results showed a relative number concentration... (2–20 µm $\bar{x}$ = 78%, 20–125 µm $\bar{x}$ = 74%) followed by the sum of <b>TBiWP</b> (2–20 µm $\bar{x}$ = 19%, 20–125 µm $\bar{x}$ = 22%).
