

Machine actionable DMPs in practice - making a **FAIR** difference at Chalmers

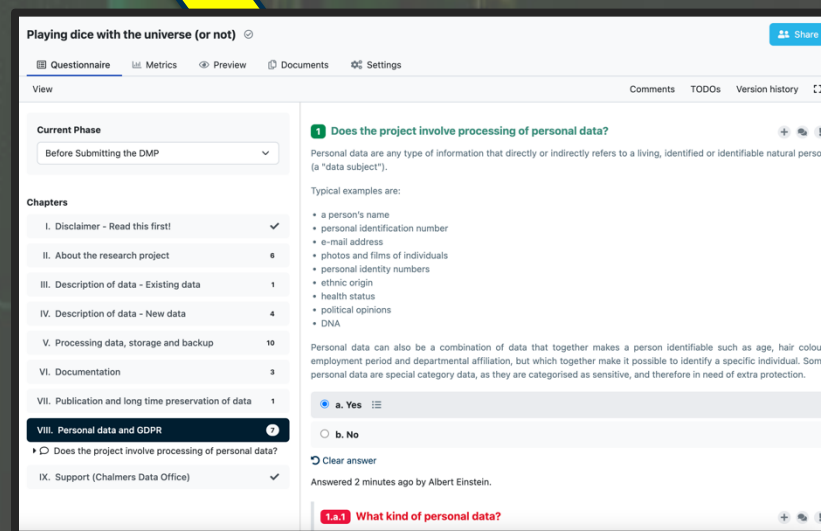

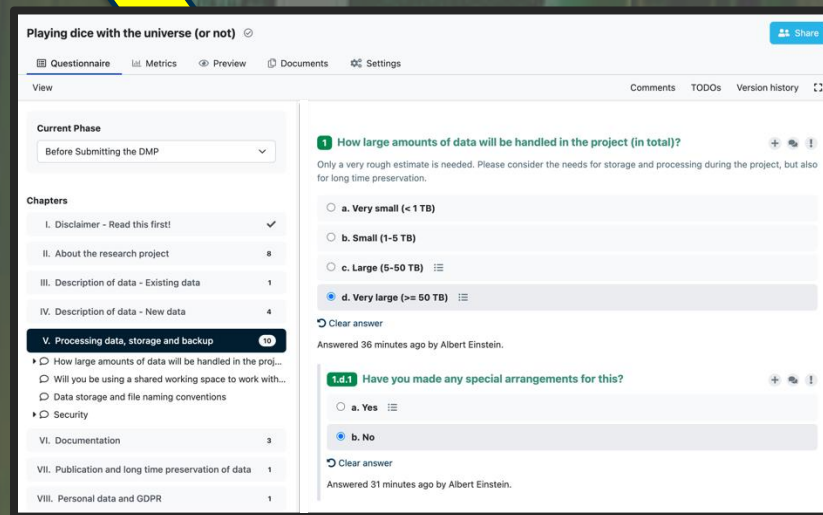

Data Stewardship Wizard

- ❖ dsw.chalmers.se
- ❖ Custom maDMP REST API service to enable integrations
- ❖ New project / DMP created at startup of research project
- ❖ User initiated and/or created automatically from local CRIS or funder systems (SweCRIS, CORDIS, GDP)
- ❖ Researcher approve use of machine actionability (maDMP)

Storage & resources

- ❖ Identify and facilitate data storage and other technical issues

Data Protection Office

Data protection

- ❖ Identify and handle personal data and GDPR issues automatically
- ❖ Sensitive data?
- ❖ Need for ethical review (or not)?
- ❖ Export control or other issues?

CRIS integration

- ❖ [Research.chalmers.se](https://research.chalmers.se)
- ❖ Use and reuse rich and controlled metadata, including PIDs
- ❖ Auto-populate newly created DMPs
- ❖ Single point of entry for researcher to access, create and update DMPs
- ❖ Single sign-on (SSO)

Publish and share

- ❖ doris.snd.se
- ❖ Facilitate and automate publishing workflows, using DMP metadata and SSO
